As a parent of 2 school children aged 9 & 11, I found the concept of the ABC keyboard a fantastic idea. My boys each had a play with it and both said 'It's much easier to use than the one at school'.

Well the new keyboard is a hit! Kids like it!

### ***Jackie M***

As a man who is in my 50's and still learning how to type on my computer I found the ABC Keyboard so easy to use. It makes so much sense to me because we all learn our ABC's at such a young age. Now I can type much easier and faster. I will not go back to the other keyboard again.
